ABOUT THIS PRODUCT

Based on the latest technology in polymer surfactant cleaning, Encap! Bonnet absorbs and cleans the worst soil. The soil is absorbed into a bonnet or suspended for later vacuuming when used with brush method. Remaining residue retards resoiling. This makes vacuuming more effective and is the foundation for an excellent maintenance system for commercial carpet.

DIRECTIONS

Dilute 1 to 16 (8oz. per gallon hot water). Dilute 1 to 8 for extra heavy soil.

Application for brush and vacuum: Spray solution consistently over section of carpet and brush with rotary and carpet brush or counter-rotating brush machine. Let dry overnight; extract with vacuum. Effective on all soil conditions.

Application for bonnet cleaning: Spray mixture lightly over an absorbent bonnet and over a section of the floor to be cleaned. Place bonnet under rotary machine and move over area until clean. Change bonnets frequently and place in plastic bag to keep moist until laundered. For use with medium to heavy soil.
