

# Rush Hour

## TRAFFIC LANE PRE-SPRAY

### ABOUT THIS PRODUCT

Rush Hour is a traffic lane cleaner designed to be used in conjunction with the cold or hot water soil extraction method of carpet cleaning. Rush Hour is formulated to loosen tough ground in soils from the carpet fibers. Greases and oils are no match for this highly concentrated product.

Rush Hour should be applied to high traffic areas that have become heavily soiled due to high amounts of foot traffic. The cleaner should be pre-sprayed on the carpet prior to the use of extraction equipment. This product will penetrate and loosen the soil and grease left from shoes and carts so it can be more easily removed during the cleaning operation.

The high concentration of detergents and degreasing agents make this product especially effective in traffic lanes where stubborn grease and oil stains can be found in restaurants, hospitals, nursing homes, schools and industry.

### PHYSICAL PROPERTIES

**Appearance:** Green Liquid

**Specific Gravity:** 1.0

**Odor:** Sweet

**Ph (Conc.):** 12-13

**Flash Point:** >212°F (100°C)

### DIRECTIONS

For use as a traffic lane pre-spray prior to cleaning with extraction equipment. Rush Hour should be diluted at a rate of 4-8 ounces per gallon of water.

DO NOT over dilute product as this could cause damage to the carpet. Always test for color fastness on colored carpet before using.

Load solution into pressure sprayer or trigger sprayer. Spray lightly over heavily soiled areas. Allow Rush Hour to react and penetrate the stain for 5 to 10 minutes. Once Rush Hour has had time to work, follow with a regular and accepted method of extraction.

### PACKAGING

4X1 gal, 5 gal

### PRECAUTIONARY STATEMENTS

**Prevention:** Wear eye protection/face protection. Wash hands and exposed skin thoroughly after handling. Wear protective gloves. **Response:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor/medical professional. IF ON SKIN: Wash with plenty of water for at least 15 minutes. Specific treatment (see section 4 on the Safety Data Sheet). If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.
