

Tuff Coat

LOW MAINTENANCE FLOOR FINISH

ABOUT THIS PRODUCT

Tuff Coat Floor Finish is a new dynamic blend of high gloss polymers, leveling agents and drying solvents. Tuff Coat Floor Finish contains a new generation rubberized polymer that is designed to keep the finish shining brighter and wearing longer. Tuff Coat Floor Finish resists scratching and gives the floor an exceptionally long wear life. Tuff Coat sets a completely new standard for floor finishes. It can be used on all resilient floors-vinyl asbestos, asphalt tile, vinyl sheet and tile, rubber, reinforced vinyl, and linoleum.

Tuff Coat Floor Finish is specially formulated for low maintenance programs. Although it can be burnished on a regular basis, Tuff Coat will continue to shine without burnishing longer than traditional floor finishes.

PHYSICAL PROPERTIES

Appearance: Milky White Liquid

Specific Gravity: 1.03

Odor: Characteristic

Ph (Conc.): 7-8

Flash Point: >200°F

Solids: 20%

PACKAGING

4X1 gal, 5 gal, 55 gal

DIRECTIONS

1. Clear the area to be finished of all movable objects.
2. Sweep the floor clean of loose dirt and rubbish.
3. Apply stripper and remove all old wax and floor finish. Repeat if necessary.
4. Rinse the floor as thoroughly as possible and let dry.
5. Work with clean equipment and mop on a thin coat of finish. Allow to dry thoroughly (at least 30-45 minutes) before applying another coat.
6. A minimum base of 4 - 5 coats is required before burnishing.

MAINTENANCE: Sweep daily with a dust mop or cloth. Clean with a neutral pH cleaner with a mop bucket or automatic scrubber. Light cleaning will remove surface soils and stains and maintain gloss and color. Dry buff or burnish after cleaning to obtain a wet look. Heavy traffic lanes should be treated with a spray buff or restorer.

PRECAUTIONARY STATEMENTS

Prevention: Wash hands and exposed skin thoroughly after handling. Wear eye protection/face protection. If skin irritation occurs: Get medical advice/attention. **Response:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
