

X-Tract

CARPET & UPHOLSTERY EXTRACTION CLEANER

ABOUT THIS PRODUCT

X-Tract is a proprietary blend of low foaming surfactant, organic acids, water conditioning agents and optical brighteners. It is a highly effective cleaner designed to aggressively clean all carpet types without harming the fabric or any stain resistant properties that may exist. X-Tract can be used with all hot and cold water extraction equipment. It's mild pH insures compatibility with all carpeting, fabric and cleaning equipment.

The carpet or furniture to be cleaned should always be vacuumed and free of debris before extraction to avoid causing further stains. X-Tract can be diluted directly into the solution tank of a carpet extractor. You can also dilute X-Tract into a sprayer. Pre-spray the carpet and then use a carpet extractor with fresh water to rinse.

Once carpet and upholstery have been cleaned, a fan should be used to help the surface dry. Always make sure that the surface is completely dry before allowing regular traffic back into the area.

PHYSICAL PROPERTIES

Appearance: Pink Liquid

Specific Gravity: 1.01

Odor: Citrus

Ph (Conc.): 12-13

Flash Point: >212°F (100°C)

PACKAGING

4X1 gal, 5 gal, 55 gal

DIRECTIONS

A color fastness test in a hidden area should always be performed before extraction on colored carpet and fabrics.

X-Tract should be diluted at a rate of 2 oz. per gallon of water. (1:64)

X-Tract can also be used as a pre-spray for all traffic areas. To use X-Tract as a pre-spray, dilute anywhere from 2 to 6 ounces per gallon depending on the amount of soil in the traffic areas. If traffic areas are heavily soiled you should use Rush Hour traffic pre-spray.

X-Tract can also be used as a bonnet cleaning solution at 2 oz per gallon.

PRECAUTIONARY STATEMENTS

Prevention: Wear eye protection/face protection. Wash hands and exposed skin thoroughly after handling. Wear protective gloves. **Response:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor/medical professional. IF ON SKIN: Wash with plenty of water for at least 15 minutes. Specific treatment (see section 4 on the Safety Data Sheet). If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.
