

# Chlorine Sanitizer

## BLEACHES AND DISINFECTANTS

### PHYSICAL PROPERTIES

**Appearance:** Clear-Light Amber Liquid

**Specific Gravity:** 1.23

**Odor:** Chlorine

**Ph (Conc.):** 13-14

**Flash Point:** N/A

### PACKAGING

4X1 gal

**EPA REG. NO. 6785-20002-74357**

**EPA EST. NO. 74357-MO-01**

### DIRECTIONS

#### SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES:

**RINSE METHOD** - a solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to ensure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1.3 oz. Of this product with 10 gallons of water. If no test kit is available, prepare a sanitizing solution by thoroughly mixing 3 oz. Of this product with 10 gallons of water to provide approximately 200 ppm available chlorine by weight. Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. If solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment and do not soak equipment overnight. Sanitizer used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

#### LAUNDRY SANITIZERS:

**COMMERCIAL LAUNDRY SANITIZERS** - wet fabrics or clothes should be spun dry prior to sanitization. Thoroughly mix 3 oz. Of this product with 10 gallons of water to yield 200 ppm available chlorine. Promptly after mixing the sanitizer, add the solution into the prewash prior to washing fabrics and clothes in the regular wash cycle with good detergent. Test the level of available chlorine, if solution has been allowed to stand. Add more of this product if the available chlorine level has dropped below 200 ppm

### PRECAUTIONARY STATEMENTS

**DANGER:** Corrosive, May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin and clothing. Wear goggles or safety glasses and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Avoid breathing vapors. Remove and wash contaminated clothing before reuse. Vacate poorly ventilated areas as soon as possible. Do not reenter until strong odors have dissipated.

#### FIRST AID

Call a poison control center or a doctor immediately for treatment advice.  
"If in Eyes", Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. "If on Skin or Clothing", Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. "If Inhaled", Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth - to mouth, if possible. "If swallowed", Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
