

Natural Lift

LIFT STATION DEGREASER

PHYSICAL PROPERTIES

Appearance: Light Yellow Liquid

Specific Gravity: 1.12

Odor: Citrus

Ph (Conc.): N/A

Flash Point: 150°F (66°C)

PACKAGING

5 gal pail, 55 gal drum

ABOUT THIS PRODUCT

Natural Lift is a unique blend of naturally occurring soy and citrus solvents specifically designed for the maintenance of lift stations and grease traps. The properties of this chemical allow it to float and suspend on "top" of the water. As the control valves and floats inside a lift station raise and lower the level of sewage, Natural Lift stays on top cleaning and degreasing the side walls and controls of the lift station.

Natural Lift is harmless to all rotors, seals, "O" rings and control valves, attacking only the undesirable grease and sludge that accumulates in these areas. It may be necessary to clean and degrease the area before applying Natural Lift as a maintainer. Consult with your representative for proper application and dosage. Cleans and Degreases walls and mechanisms automatically. Use on sides of tanks, in sewer lines, ect. Easy to use - just pour in. Will not freeze.

DIRECTIONS

For Grease Traps: To keep clean, fresh smelling and free flowing, add enough product to maintain a 1 to 3 inch layer above the water level. (Two quarts will cover 60 square inches at a depth of 2 inches.) If trap is heavily loaded with grease, it must be cleaned out manually before adding this product.

For Sewage Plants: Add to lift station. Depending on quantity of accumulated scum, grease and oils; Pour in enough product to maintain a blanket layer of 1 to 3 inches. It takes approximately one gallon of product per square foot.

PRECAUTIONARY STATEMENTS

Prevention: Keep away from flames and hot surfaces. No smoking. Wear protective gloves/-eye protection/face protection. Wash hands and exposed skin thoroughly after handling.

Response: In case of fire: Use water fog, foam or carbon dioxide (CO2) to extinguish. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF SWALLOWED: Immediately call a POISON CENTER/ doctor/medical professional. Do NOT induce vomiting.

Storage: Store in a well-ventilated place. Keep cool. Store locked up.

Diposal: Dispose of contents/container in accordance with local/regional/ national/international regulations.
