**Specific Gravity:** 1.05

**Odor:** Cucumber Melon

**Ph (Conc.):** 5-7

**Flash Point:** >385°F (196°C)

### PACKAGING

4X1 gal

### ABOUT THIS PRODUCT

Foaming Hand Soap Concentrate is a 5 to 1 concentrate. Each gallon of product makes 6 gallons of ready to use foaming hand soap.

This product is a blend of mild, high foaming surfactants, and skin conditioning agents formulated to provide a pleasant yet effective hand cleaning product. It is designed for use in Schools, hospitals, dentist offices, restaurants, nursing homes, or any large use facility. This product also contains an emollient to moisturize skin as it cleans, even with regular and repeated use.

### DIRECTIONS

To properly dilute the product, connect the container to a dispensing unit set to dilute at 1 part chemical to 5 parts water. Connecting the product to the dispensing system using the closed loop insert will insure proper dilution of the product giving the best results for the diluted product.

Once the product is connected to the dispensing system simply fill an empty container with the diluted product. The product that has been filled into the container is now ready to be used in a bulk fill foam soap dispenser. Be sure to clean out the tank on the foam soap dispenser before filling it up with soap. Once the tank is clean fill it up with the diluted hand soap. Close the foam soap dispenser and prime the dispenser by pumping the dispenser until soap is dispensed on your hand. The soap dispenser is now ready to go.

The grey dilution lock in the opening of the container should never be removed. If the dilution lock has been removed, the contents of the container and the container should be properly disposed of.

### PRECAUTIONARY STATEMENTS

**Prevention:** Wash hands and exposed skin thoroughly after handling. Wear protective gloves. Wear eye protection/face protection. **Response:** IF ON SKIN: Wash with plenty water. Specific treatment (see Section 4 on the Safety Data Sheet) If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
