

CONCRETE GUARD

Concrete Guard is formulated to provide the ultimate in concrete protection by using both dual-action technology and hybrid polymers. Concrete Guard is environmentally friendly, VOC- compliant, and provides increased stain suspension and resistance against most contaminants found in kitchens, retail food stores, restaurants, malls, garages, warehouses, distribution centers, etc. While originally formulated to be used in conjunction with hardened concrete floor systems, Concrete Guard may also be used anywhere a clear, high-gloss, dual-action concrete protection system is desired. Concrete Guard is designed for use on previously sealed surfaces, as well as surfaces that have been previously stained or dyed and sealed.

DIRECTIONS

1. Deep clean the floor or strip off old sealers if needed using **BLAST** or **ULTRA STRIP**. If stripping, use a neutral cleaner such as **FRESH 7** to mop after and then do a final fresh water rinse to ensure there is no residue and the floor is completely neutralized.
2. Use **CONCRETE GUARD** straight for a high gloss finish or It can be mixed 1:1 if a very thin coat and lower gloss is desired. Pour or spray Concrete Guard on the floor with a pump up sprayer and spread the finish over the floor leaving a thin coat with a microfiber flat mop. Allow the first coat to dry for at least one hour. **Optional:** wait 24 hours and burnish the first coat.
3. Apply a second coat in the same manner and allow it to dry for 24 hours and burnish with a white pad or hog hair light with high speed moving quickly. Do Not apply more than 2 coats
4. For Daily Maintenance, Clean with a neutral cleaner such as **FRESH 7** using a mop bucket or an auto scrubber with a white or red pad. When scrubbing the floor do not stop the auto scrubber until the pad quits turning, lifting the deck to avoid any potential for circles.
5. Burnish no more than twice weekly with a white pad or hog hair light with high speed moving quickly.

Item #: 2585
Dilution: RTU

Appearance: Milky White Liquid
Odor: Characteristic

Ph (Conc.): 7-8
Specific Gravity: 1.03

Packaging: 4x1, 5, 55 gal
Flash Point: >200°F.

ADDITIONAL CONCRETE CARE PRODUCTS

CONCRETE SEALS

CONSEAL WB

A high gloss, water-based concrete sealer designed for easy application. Use on sealed or unsealed concrete.

Dilution: RTU
Packaging: 4x1, 5, 55 gal
Item #2500

CONSEAL SB

A highly durable solvent-based concrete sealer with oil modified urethane.

Dilution: RTU
Packaging: 4x1, 5, 55 gal
Item #2550

CLEANERS

LS DAILY CLEANER

A specially formulated daily cleaner for concrete floors treated with lithium silicate densifier.

Dilution: 2 oz/gal
Packaging: 4x1, 5 gal
Item #2590

Z-OX

An acid formula designed to etch and renew concrete surfaces.

Dilution: 20 oz/gal
Packaging: 4x1, 5, 55 gal
Item #2560

DENSIFIERS

LITHIUM SILICATE DENSIFIER RTU

A ready-to-use lithium silicate hardener and densifier for concrete surfaces.

Dilution: RTU
Packaging: 4x1, 5, 55 gal
Item #2575

LITHIUM SILICATE DENSIFIER CONC.

A concentrated lithium silicate hardener and densifier for concrete surfaces.

Dilution: 32 oz/gal
Packaging: 4x1, 5 gal
Item #2580
